AUTOMOTIVE CONGRESS 2018

Perspectives & Expertise in the fast growing, innovative Automotive supply chain...

Automotive Congress has over the last years proven to be the most important and interesting happening on the Dutch automotive technology calendar. The congress and its participants will proudly reveal the state-of-art technology and discuss the challenges we face in this exiting industry. Various executive key note speeches from leading companies will inform and discuss about most relevant current topics.

The Automotive industry is a truly global sector characterized by complex value chains and continuous innovations, Internationalization and Collaboration are key words for success. It is also for this reason that the organizing partners of this event, AutomotiveNL, RAI Automotive Industry and

Mikrocentrum, are more than happy to join their forces. We are particularly pleased that the venue will be the Evuon in Eindhoven. We hope to welcome you at the 23rd of May 2018.

Highlight the specific expertise of your company

There will be international speakers from Car Manufacturers / Suppliers, we will focus on specific developments in Smart Mobility, Green Mobility, Manufacturing & Logistics and Materials & Design. Besides that we organize an exhibition for Automotive supply companies.
